 ★Geometrical approaches to differential equations. 81i:35002
 Differential equations and their applications ★Дифференциальные уравнения и их приложения. (Russian) [Differential equations and their applications] 81f:35003
 Dynamical systems ★Nonlinear evolution equations and dynamical systems. 81f:35004
 Eigenvalue problems ★Bifurcation and nonlinear eigenvalue problems. 81c:35001
 Functional analysis ★Теория кубатурных формул и приложения функционального анализа к задачам математической физики. (Russian) [Theory of cubature formulas and the application of functional analysis to problems of mathematical physics] 81f:35006
 ★Применение методов функционального анализа к задачам математической физики и вычислительной математики. (Russian) [Application of the methods of functional analysis to problems of mathematical physics and numerical analysis] 81j:35001
 Functions ★Крайевые задачи математической физики и смежные вопросы теории функций. 12. (Russian) [Boundary value problems of mathematical physics and related questions in the theory of functions. 12] 81f:35002
 Geometrical approaches to differential equations ★Geometrical approaches to differential equations. 81i:35002
 Inverse problems for differential equations of mathematical physics ★Обратные задачи для дифференциальных уравнений математической физики. (Russian) [Inverse problems for differential equations of mathematical physics] 81j:35003
 Kingston, R. I. ★Nonlinear partial differential equations in engineering and applied science. 81d:35002
 Lecce ★Nonlinear evolution equations and dynamical systems. 81f:35004
 Mathematical physics ★Крайевые задачи математической физики. 10. (Russian) [Boundary value problems of mathematical physics. 10] 81d:35001
 ★Крайевые задачи математической физики и смежные вопросы теории функций. 12. (Russian) [Boundary value problems of mathematical physics and related questions in the theory of functions. 12] 81f:35002
 Meeting:
 Nonlinear Evolution Equations and Dynamical Systems ★Nonlinear evolution

- equations and dynamical systems. 81f:35004
- Nonlinear eigenvalue problems** ★Bifurcation and nonlinear eigenvalue problems. 81c:35001
- Nonlinear evolution equations** ★Studies on some nonlinear evolution equations. 81i:35003
- Nonlinear evolution equations and dynamical systems** ★Nonlinear evolution equations and dynamical systems. 81f:35004
- Nonlinear partial differential equations in engineering and applied science** ★Nonlinear partial differential equations in engineering and applied science. 81d:35002
- Nonlinear systems** ★Classical and quantum aspects of completely integrable nonlinear systems. (Japanese) 81m:35001
- Novosibirsk** ★Дифференциальные уравнения с частными производными. (Russian) [Partial differential equations] 81m:35002
- Numerical mathematics** ★Дифференциальные уравнения с частными производными. (Russian) [Partial differential equations] 81m:35002
- Oscillation theory** ★Теория рассеяния. Теория колебаний. (Russian) [Scattering theory. Theory of oscillations] 81a:35003
- Partial differential equations** ★Дифференциальные уравнения с частными производными. (Russian) [Partial differential equations] 81a:35002
- ★Дифференциальные уравнения с частными производными. (Russian) [Partial differential equations] 81f:35005
- ★The study of the structure of solutions of partial differential equations. (Japanese) 81m:35004
- ★Journées "Équations aux Dérivées Partielles". (French) [Conference on Partial Differential Equations] 81j:35002
- ★Дифференциальные уравнения с частными производными. (Russian) [Partial differential equations] 81m:35002
- ★Séminaire Goulaouic-Schwartz, 1979-1980. (French) 81m:35003
- ★Studies in the structure of solutions of partial differential equations. (Japanese) 81m:35005
- Problems in mathematical physics** ★Теория рассеяния. Теория колебаний. (Russian) [Scattering theory. Theory of oscillations] 81a:35003
- Proceedings of the S. L. Sobolev Seminar, No. 1** ★Теория кубатурных формул и приложения функционального анализа к задачам математической физики. (Russian) [Theory of cubature formulas and the application of functional analysis to problems of mathematical physics] 81f:35006
- Proceedings of the S. L. Sobolev Seminar, No. 2** ★Дифференциальные уравнения с частными производными. (Russian) [Partial differential equations] 81a:35002
- ★Дифференциальные уравнения с частными производными. (Russian) [Partial differential equations] 81f:35005
- Saint Jean de Monts** ★Journées "Équations aux Dérivées Partielles". (French) [Conference on Partial Differential Equations] 81j:35002
- Scattering theory. Theory of oscillations** ★Теория рассеяния. Теория колебаний. (Russian) [Scattering theory. Theory of oscillations] 81a:35003
- Scheveningen** ★Geometrical approaches to differential equations. 81i:35002
- Séminaire:**
- Goulaouic-Schwartz ★Séminaire Goulaouic-Schwartz, 1979-1980. (French) 81m:35003
- Seminar:**
- Equations with Partial Hyperbolic and Holomorphic Derivatives ★Séminaire sur les Équations aux Dérivées Partielles Hyperboliques et Holomorphes, Année 1979-1980. (French) [Seminar on Hyperbolic and Holomorphic Partial Differential Equations] 81k:35003
- Seminar:**
- Bifurcation and Nonlinear Eigenvalue Problems ★Bifurcation and nonlinear eigenvalue problems. 81c:35001
- Studies on some nonlinear evolution equations** ★Studies on some nonlinear evolution equations. 81i:35003
- Studies in the structure of solutions of partial differential equations** ★Studies in the structure of solutions of partial differential equations. (Japanese) 81m:35005
- Study of the structure of solutions of partial differential equations** ★The study of the structure of solutions of partial differential equations. (Japanese) 81m:35004
- Symposium:**
- Classical and Quantum Aspects of Completely Integrable Nonlinear Systems**
- ★Classical and quantum aspects of completely integrable nonlinear systems. (Japanese) 81m:35001
- Studies in the Structure of Solutions of Partial Differential Equations** ★Studies in the structure of solutions of partial differential equations. (Japanese) 81m:35005
- ★The study of the structure of solutions of partial differential equations. (Japanese) 81m:35004
- Theory of cubature formulas and the application of functional analysis to problems of mathematical physics** ★Теория кубатурных формул и приложения функционального анализа к задачам математической физики. (Russian) [Theory of cubature formulas and the application of functional analysis to problems of mathematical physics] 81f:35006
- Villetaneuse** ★Bifurcation and nonlinear eigenvalue problems. 81c:35001
- secondary classifications:
- (Axelsson, Owe) See Analytical and numerical approaches to asymptotic problems in analysis. (81m:65005)
- (Bardos, Claude) See Bifurcation phenomena in mathematical physics and related topics. (81f:00012)

REVIEWS IN RING THEORY

Compiled and Edited by Lance W. Small

Department of Mathematics, University of California, San Diego

These volumes collect 5,396 reviews from *Mathematical Reviews* of papers in noncommutative ring theory. All reviews of papers in ring theory from Volume 21 (1960) through Volume 58 (1979) appear here. Additionally, the editor has collected those papers from Volume 1 through Volume 20 which are necessary background. Papers on group rings, homological questions, and enveloping algebras with ring theoretic interest are also included.

Each review has an "appearance number" specifying the location of the review by chapter, section and number within the section. By and large, reviews within one section are arranged in "rough" chronological order (i.e., by appearance in *Mathematical Reviews*). The principal exceptions are papers in a series and very closely related papers. If a cited review occurs in these volumes, then its appearance number is listed after the review in which it is cited.

Cross-references are given at the beginning of some sections and chapters to inform the reader of closely related reviews appearing elsewhere. These cross-references may also be useful to the reader as a guide to finding reviews which do not appear where the reader thinks they should.

These volumes are a research tool. There are no other books containing the information herein except *Mathematical Reviews* itself.

The editors' previous work includes over 40 papers in ring theory. He has been a reviewer for *Mathematical Reviews* since 1968.

The work is divided into 31 chapters each subdivided into 3 to 21 sections. Chapter headings are:

1. Primitive, prime and semi-prime rings
2. Theory of radicals
3. Nil, nilpotent and radical rings
4. Simple and semi-simple Artin rings
5. Division rings
6. Matrices over commutative rings and fields and linear algebra (ring theoretic)
7. Classical orders, integral representation theory, arithmetic in algebras
8. Separable algebras, Azumaya algebras and their generalizations
9. Galois theory
10. Hopf algebras—algebraic theory
11. Rings satisfying a polynomial identity
12. Rings with involution
13. Lie and Jordan structures on rings
14. Module theory (general)
15. Projective modules, flat modules and their generalizations
16. Injective modules, self-injective rings and generalizations
17. Von Neumann regular rings and their generalizations
18. Artin rings
19. Quasi-Frobenius (QF) rings and their generalizations
20. Perfect, semi-perfect rings and modules and their generalizations
21. Integral domains
22. Goldie's theorem, rings of quotients
23. Noetherian rings
24. Group rings
25. Homological and categorical methods in ring theory
26. Torsion theories
27. Automorphisms, endomorphisms and derivations on rings
28. Commutativity theorems. Generalizations of commutative rings
29. Topological rings and modules. Ordered rings
30. Other rings and algebras. Miscellaneous topics and results
31. Books, conference proceedings and surveys

Published in 2 volumes, xii + 1,114 pages (soft cover). List price \$160.00, institutional member \$120.00, individual member \$40.00, student \$20.00. ISBN 0-8218-0215-1; LC 81-10770. Publication date: August 1981. To order, please specify REVRING. Prepayment is required.

REVIEWS IN GRAPH THEORY

Compiled and Edited by William G. Brown
MCGILL UNIVERSITY
DEPARTMENT OF MATHEMATICS

This publication is a four-volume compendium of about 9,600 reviews in graph theory published by **Mathematical Reviews** in Volumes 1 through 56, i.e. between 1940 and 1978 inclusive. Reviews were selected from the several sections of **Mathematical Reviews** which were the usual repositories of such items; from the subject lists in **Mathematical Reviews** indexes, where available; and through a systematic perusal of about half of all reviews published by **Mathematical Reviews** during the 39 years under consideration. Every review cited in a selected review was also read, and the process iterated until stable.

A classification scheme containing over 500 categories was developed for the purpose. Every review has been assigned one primary classification and, on the average, one secondary classification. Reviews are reprinted in strict chronological order of **Mathematical Review** numbers in their primary subject area, with a brief citation at each secondary location.

The final volume provides a detailed author index, which can serve as an effective bibliography of the subject.

These volumes are a research tool. They are directed to anyone who has occasion to consult the literature of graph theory: mathematicians, computer scientists, engineers, and management scientists, as well as students, teachers, and practicing researchers.

The potential reader requires no more background than would be required to read papers which are reviewed in the compendium. These vary from highly erudite papers in other areas of mathematics where graph theory is used as a tool to solve specific problems, to elementary descriptive papers which would be understandable to high school students.

A few of the reviews are themselves gems of the mathematical literature. But, for the most part, the reader will use this book as a research tool—to determine what has been done in a particular area of the subject, or to locate known papers when the values of not all parameters are available.

There has been nothing of this scope or magnitude in the subject before. This is the first major bibliography in graph theory which incorporates reviews.

The editor's previous work includes research papers in graph theory and related fields, and many reviews.

	List	Inst. Memb.	Indiv. Memb.	Student
Complete set (CODE: REVGRAPH)	\$200	\$150.00	\$50	\$25.00
Volume 1, 604 pages (REVGRA/1)	68	51.00	17	8.50
Volume 2, 564 pages (REVGRA/2)	68	51.00	17	8.50
Volume 3, 592 pages (REVGRA/3)	68	51.00	17	8.50
Volume 4, 340 pages (REVGRA/4)	40	30.00	10	5.00

Prepayment is required for all AMS publications. Order from AMS, P. O. Box 1571, Annex Station, Providence, RI 02901, or call toll free 800-556-7774 to charge with Visa or MasterCard.
